

# Insist on the Best Sealant for the Job. Insist on Hardcast.

**Proper sealing of ductwork can prevent 25-40% of air loss in HVAC Systems.**

Building owners understand that leakage negatively impacts their equipment, air quality, and energy consumption. When properly installed, sealed and maintained with Hardcast, ductwork can give your building:

- Superior Energy Efficiency
- Optimal Thermal Temperature
- Increased Indoor Air Quality

Backed by our industry leading warranties, seal with confidence using Hardcast liquid and rolled sealants.
